CargoMax on Greek computers

To get CargoMax working on Greek vessels you need to check the following in the Control Panel – Region settings.

If it is set to Greek, then it will not open any ships. It may run CargoMax but cause an error when you try to load or change ships.

Control Panel\Clock, Language and Region		
-> 🔹 🛧 🧼 > Control	Panel > Clock, Language and Region	
ontrol Panel Home /stem and Security	Date and Time Set the time and date Change the time zone Add	clocks for different time zones
etwork and Internet ardware and Sound	Add a language Change input methods	Region ×
ograms ser Accounts ppearance and	Region Change location Change date, time or number form	ts Welcome screen and new user accounts View and copy your international settings to the welcome screen,
ersonalisation l ock, Language and Regic ase of Access	'n	system accounts and new user accounts.
		Language for non-Unicode programs This setting (system locale) controls the language used when displaying text in programs that do not support Unicode. Current language for non-Unicode programs: English (Australia)

You also need to check that the decimal is set as a "." And not a ","
